

TSV-EP57 HDMI Extender Over Fiber

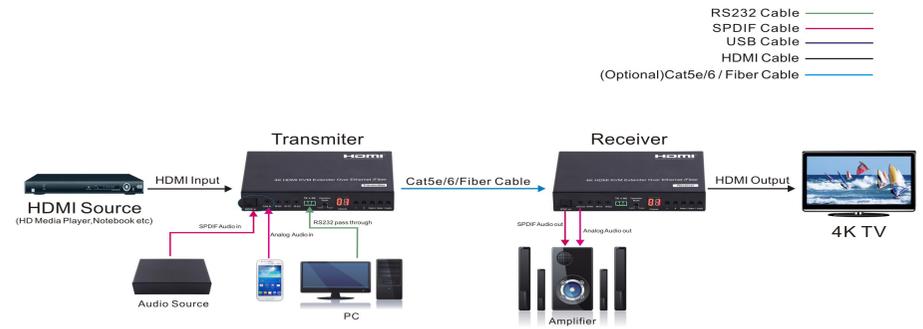

4K Low latency KVM HDMI Extender over IP/Fiber, With LED With POE

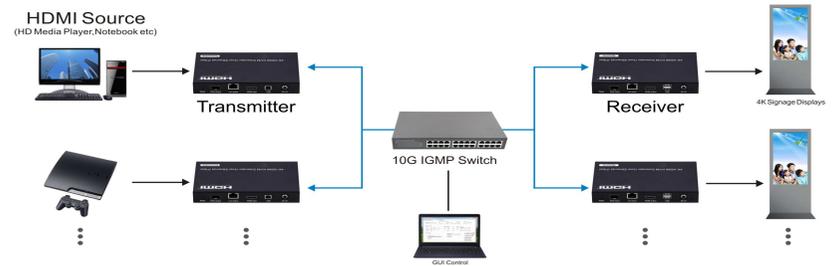

Features

- 1). 4K UHD HDMI over IP/Fiber Extension
- 2). USB2.0 over IP extension
- 3). Support transmission distance 120m over single Cat5e/6 cable
- 4). Support Fiber optical up to 60KM Single Mode
- 5). Support input 4k@60hz YUV 420 Max ,output 4k@30hz Max
- 6). HDCP 2.2/HDCP1.4 compliant
- 7). Support Bi-Directional Wide Band IR 38KHZ-56KHZ Pass through
- 8). Support RS232 pass through and control,Telnet command
- 9). With IR remote/Button to control the Group ID,with LED to show the Group ID
- 10). Support Dolby True HD,DTS-HD Master Audio
- 11). Input audio:SPDIF 5.1 and L/R Analog Audio Embedded
- 12). Output audio:SPDIF 5.1 and L/R Stereo Analog audio extraction
- 13). Support Unicast,Multicast,Video Wall system Max 8x16 ,Output video Rotation
- 14). 10-Gigabit IGMP Ethernet Switch can be cascaded for many layers

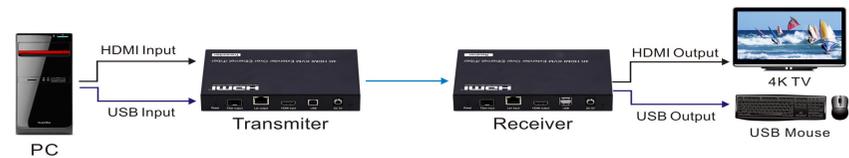

Application 1: Unicast

Application 2: Multicast

Application 3: KVM

Application 4: Video Wall (Max. 8x16)
